Hands-on Programming

Portfolio Projects

FrauenLoop
digital literacy for residents & newcomers

Dr. Nakeema Stefflbauer
Founder
FrauenLoop gUG

FrauenLoop provides companies with access to a skilled pool of women professionals who understand how programming drives digital product & service delivery.

We support women career-changers (both EU residents and approved asylum seekers) through an integrated nine-month program covering 240+ hours of training in web-based programming, interactive development, and data management.

Technology is becoming more inclusive of the women who rely on it. FrauenLoop speeds the process for women to contribute to tech-driven industries — and to European society at large.

Phase I
Web
Development
ROR

Phase II
Interactive
Design
JS

Phase III
Data
Analytics
SQL
